Executive summary

Free State Life and Health services is a sole proprietorship insurance advisory business specializing in Medicare Advantage (Part C), senior health insurance, and life insurance solutions for families and individuals across the Washington, D.C., Maryland, and Virginia (DMV) region. The business focuses on helping seniors—including many veterans—navigate Medicare plan options while also providing life insurance protection for both adults and children.

The company serves two complementary markets: Medicare-eligible seniors seeking guidance on health coverage, and families seeking life insurance solutions such as term life, whole life, and final expense policies. Many clients require education and personalized consultation to understand their options, and the company addresses this need through clear explanations, compliant enrollment support, and long-term client service.

With a 9/11 veteran serving in an advisory role, Free State will maintain strong connections to veteran communities. Outreach through homeless shelters, churches,

and back-to-work programs will provide education about health and life insurance options while also serving as a meaningful community resource.

Since launching operations, the business has demonstrated consistent year-over-year growth driven primarily through relationship-based sales and referrals. Revenue has grown from approximately **\$5,000 in 2023 → \$17,000 in 2024 → \$57,000 in 2025** , with projected production of **\$103,000 in 2027** as the client base expands and renewal commissions accumulate.

The business operates within a federally regulated Medicare Advantage commission structure that provides predictable recurring income. Initial commissions average approximately **\$694 per enrollment nationally and up to \$781 in the Washington, D.C. region**, followed by annual renewal commissions averaging **\$347 nationally and up to \$391 regionally**. As the client portfolio grows, these renewals create a compounding revenue stream that strengthens long-term financial stability.

Free State maintains a lean operating structure with minimal overhead and scalable digital enrollment tools. Loan proceeds will support compliant lead generation and targeted marketing initiatives designed to accelerate growth among seniors, veterans, and families seeking dependable health and life insurance coverage.

Market analysis

The primary market for Free State consists of Medicare-eligible seniors, veterans, individuals seeking life insurance coverage in the DMV region (Washington, D.C., Maryland, and Virginia).

The United States has approximately 65 million Medicare beneficiaries, with enrollment expected to continue rising as the population ages. The DMV region represents a particularly strong market due to its large population of federal retirees, military veterans, and aging residents approaching Medicare eligibility.

Medicare Advantage enrollment continues to grow nationwide as seniors seek plans that provide additional benefits such as prescription drug coverage, dental, vision, and lower out-of-pocket costs. At the same time, demand for final expense and term life insurance remains strong among older adults seeking financial protection for families and end-of-life expenses.

Marketing and Sales

Free State generates new business through a combination of relationship-based referrals, targeted lead generation, and educational outreach.

Marketing efforts focus on reaching Medicare-eligible seniors and families through compliant lead acquisition platforms, digital marketing, and community networking. Educational consultations help prospective clients understand Medicare Advantage options, life insurance products, and enrollment timelines.

Sales are conducted through both virtual consultations and in-person meetings. A key component of the strategy is client retention and referral generation. Satisfied clients frequently refer friends and family members, creating a sustainable pipeline of new prospects while strengthening long-term relationships.

Loan proceeds will primarily support lead acquisition, marketing campaigns, and client outreach initiatives, particularly during Medicare's Annual Enrollment Period when demand for advisory services is highest.

Financial Projections

Free State operates on a commission-based revenue model derived from Medicare Advantage enrollments, health insurance placements, and life insurance policy sales. The business generates both **initial commissions** from new enrollments and **recurring renewal commissions** from policies that remain active in subsequent years. This structure allows the company to build a compounding revenue base as the client portfolio grows.

The business has demonstrated consistent growth since inception, increasing annual revenue from approximately **\$5,000 in 2023** to **\$17,000 in 2024**, and to **\$57,000 in 2025**. With additional marketing resources and increased lead generation, Free State projects revenue of approximately **\$103,000 by 2027**, driven by a combination of new policy enrollments and renewal income from previously enrolled clients.

Projected revenue growth is supported by three key factors. First, Medicare Advantage policies generate recurring renewal commissions averaging approximately **\$347 to \$391 annually per active client**, creating a stable income base over time. Second, the senior population in the DMV region continues to grow as more individuals age into Medicare eligibility each year. Third, life insurance sales—including term, whole life, and final expense policies—provide additional commission revenue and cross-selling opportunities within the existing client base.

Use of Funds

Free State is seeking a **\$25,000 loan** to support growth initiatives that will accelerate client acquisition and expand the company's insurance portfolio.

Loan proceeds will be allocated across the following areas:

Lead Generation and Marketing → **\$15,000**, funds will be used to purchase compliant insurance leads and support digital marketing campaigns targeting Medicare-eligible seniors and families seeking life insurance coverage.

Technology and CRM Systems → **\$4,000**, Investment in customer relationship management tools, quoting platforms, and digital enrollment systems will improve lead tracking, compliance documentation, and client follow-up capabilities.

Licensing, Certifications, and Professional Development → **\$3,000**, funds will support continuing education (CE) credits and state licensure.

Working Capital → **\$3,000**, a portion of the loan will provide operating flexibility to support business development activities, travel for client consultations, and administrative expenses during growth periods.

Owner bio data

Rasheim T. Freeman is a life and health insurance professional with over five years of experience focused on building practical wellness and financial systems for seniors, veterans, and families. Nearly **27 million Americans lack health insurance**, and roughly **100 million adults have little or no life insurance coverage**—gaps that Freeman believes can be addressed through a modern version of the traditional kitchen-table conversation: clear education, trusted guidance, and solutions tailored to everyday households.

The preceding 10+ years were spent in marketing, managing accounts for large NYC publishers, where Freeman leveraged digital ad conversion and sales expertise to increase digital sales. Today, he spends his time commuting between the low country near Port Royal, SC and Baltimore, MD educating and advocating for underserved communities.
